

Have you been admitted to hospital for **Chronic Obstructive Pulmonary Disease (COPD)**?

This hospital is involved in a national project to make the care of patients with COPD better.

Since **1 February 2017**, we have collected information about people admitted to this hospital with a COPD flare-up. This includes confidential information.

The project is called the **National Respiratory Audit Programme (NRAP)**.

This information will be used to help improve COPD care for patients.

For more information about the project or how to opt-out, please ask a member of the hospital team for an information leaflet.

You will need to give your consent for your data to be included in this audit. A member of the pulmonary rehabilitation team will provide you with a patient information sheet and consent form. Please let them know if you do not wish to take part.
