

Have you been assessed for pulmonary rehabilitation for your respiratory condition?

This service is involved in a national project to improve the delivery of PR and the care of patients with the following respiratory conditions:

- Asthma
- Interstitial lung disease
- Pre/post thoracic surgery (inc. lung volume reduction)
- Bronchiectasis
- Long COVID
- Pulmonary hypertension
- COPD
- Chronic heart failure
- Other chronic respiratory disease

This project is called the **National Respiratory Audit Programme (NRAP)**.

Since **01 November 2023**, we have collected information about patients with these respiratory conditions assessed for pulmonary rehabilitation, and the care they receive. This includes confidential information.

For more information about the project, or how you can opt-out, please scan the QR code or ask a member of the PR team for an information leaflet.
